A passionate person who studies electronic and communication engineering currently, with interest and knowledge in embedded systems design field, and outside the scope of engineering in management, HR and marketing with different experiences and skills in each, I had a diploma in embedded systems and knowledge of software design in embedded systems with time determinity in mind, Currently I am vice head robotics and embedded systems at a non-profitable student activity aimed to share knowledge and teaching youth located in Cairo.

## Skills

### Languages

Arabic Native  
English Fluent

### Technical

C&C++ Studied design patterns and scheduling of tasks  
Programming Embedded C(*Worked with AVR Atmega, PIC, ARM and i8051*)  
Simulation with Protues and Multisim  
PCB Design with Eagle and KiCad  
Linux superuser  
Good knowledge of RTOS

### Other fields

Marketing Course  
HR Course  
Project Management sessions

### Life

Presentaion skills  
Leadership  
Co-operating in a team

## Experiences

### Technical Experience

Self Learning projects in embedded systems(*i.e:Heater, Embedded framework with scheduler*)  
Embedded System Diploma with graduation projects(*Vending Machine, ATM Machine, A Robot*)  
Currently vice head at PI -a student activity aimed to teach students the after graduation skills- in Robotics and Embedded systems branch(*Trained Students on Embedded systems and prepared my own material to teach from*)  
Summer training in Je telecom in Analog and Digital Elctronics

### General Experience

HR course  
Marketing Course  
Participated in college student avtivity in the PM branch  
Working now as Arabic and English Instructor for Non-native People
